

Integrated Audio Makes Your Meetings Easy

Audio-only meetings scheduled from your Mac, PC, or mobile device.

In a Zoom audio conference, you can use either your telephone or your computer to connect to the audio portion of your meeting. If you are a host, you can invite up to 500 participants to your audio conference.

Participants can choose how they want to connect to the audio conference. They are prompted to choose:

- ★ **Telephone**— Use your telephone to dial in or to receive a call-back. Any telephone can call into a Zoom meeting, including PBX phones. If a PBX is also a SIP system, then they can connect via our H.323/SIP Connector.
- ★ **Computer**— Use your computer to communicate through VoIP (Voice over Internet Protocol) if you have a computer with a supported sound card and a connection to the Internet.

We support HD voice by using SILK and Opus voice codec with advanced algorithms in noise suppression, acoustic echo cancellation, and gain control. We believe audio is critically important and will prioritize it over video in low-bandwidth situations.

Flexible

- ★ VoIP, Call-In, Call-Out, and Global Toll-Free
- ★ Pay as you go or monthly commitments start at \$100
- ★ Web interface to manage participants in your pure conference call
- ★ Option to integrate with any 3rd-party teleconferencing service

Global Toll-Free

- ★ No charge to your participants to call in from any device
- ★ Easily select one or multiple countries for toll-free call-in – numbers available in over 60 countries

Call Me and Call Out

- ★ Option to call your phone when the meeting starts
- ★ Option to call any other participants' phone when the meeting starts
- ★ Option for dedicated dial-in number, so your participants can quickly join the meeting without entering a meeting ID or PIN

About Zoom

Zoom makes video and web conferencing frictionless. Founded in 2011, Zoom is the leader in modern enterprise video communications, with a secure, easy platform for video and audio conferencing, messaging, and webinars across mobile, desktop, and room systems. Zoom Rooms is the original software-based conference room solution used around the world in conference, huddle, and training rooms, as well as executive offices and classrooms. Zoom helps over 600,000 businesses and organizations bring their teams together to get more done. Zoom is publicly traded on Nasdaq (ticker: ZM) and headquartered in San Jose, California.
